

XBRL Expertise and Solutions

A complete suite of products and services
from the leading experts in XBRL

UBPARTNER

UBPartner is one of the real experts in the implementation and development of XBRL (eXtensible Business Reporting Language). With its combination of products and experience, UBPartner is uniquely qualified to aid companies, both large and small, in adopting XBRL.

At the core of the UBPartner XBRL tool-kit is the UBmatrix XBRL Processing Engine, a technology platform deployed by governments and enterprises worldwide; and the XBRL platform of choice for leading software vendors.

UBPartner's XBRL tools span the full lifecycle of XBRL development, and can be deployed as standalone tools or as part of an integrated XBRL solution.

Why UBPartner?

- ▲ *The most complete set of software for XBRL-based business reporting*
- ▲ *Advanced validation and XBRL Formula support*
- ▲ *Trusted XBRL technology partner to leading software vendors*
- ▲ *Extensive range of implementation partners experienced in local reporting requirements*
- ▲ *Unrivalled real-world expertise in XBRL systems*

UBmatrix™ XBRL Processing Engine

- ▲ Fully conforms to the latest XBRL standards including XBRL Formula, Inline XBRL and Rendering specifications
- ▲ Flexible architecture provides support for both desktop applications and for high volume, large scale processing of XBRL documents
- ▲ Full set of APIs and object-oriented architecture, enables developers to easily integrate XBRL processing into either Java or .NET applications

XBRL Taxonomy Design

- ▲ Taxonomy Explorer provides an easy to use tool for reviewing and analysing XBRL taxonomies.
- ▲ XBRL Taxonomy Generator enables taxonomies to be generated automatically from Excel and other formats.

XBRL Reporting Tools

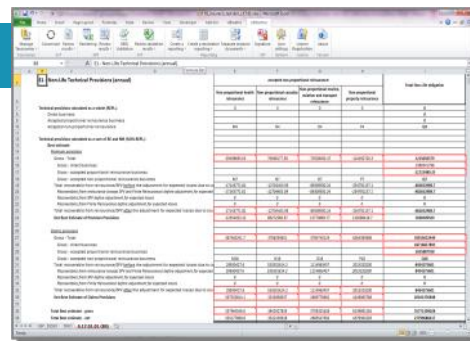

- ▲ XBRL Conversion Tool enables end-users to generate XBRL documents from templates without any prior knowledge of XBRL.
- ▲ XBRL Rendering Tool enables XBRL documents to be displayed in Excel templates, highlighting any validation errors for business users.
- ▲ Report Builder provides a powerful mapping interface that allows users to generate XBRL documents from MS Excel and MS Word

XBRL Integrated Applications & Storage

- ▲ XBRL Applications provide an integrated solution for managing, storing, and analyzing XBRL documents
- ▲ XBRL Database Adapters and Extensions enable XBRL documents to be stored and analysed using a standard database environment.

XBRL Adoption Support for Software Developers

- ▲ UBPartner’s experience can help ensure your XBRL project is successful and help guide you through the steep learning curve that surrounds all new technology adoption
- ▲ A range of flexible XBRL tools to suit every requirement, will enable your XBRL project to get up and started quickly.
- ▲ A powerful and proven technology platform, unrivalled in its scope and performance and already deployed by major software vendors.

Simple and easy to use XBRL solutions for business experts, such as pre-mapped Excel templates with highlighted errors

Range of XBRL tools for specialists, such as Taxonomy Explorer

Expert Advice & Consulting Services

- ▲ The UBPartner services team has real world experience of developing XBRL taxonomies, implementing XBRL collection systems and developing filing solutions.
- ▲ An extensive network of local implementation partners, can deliver a range of solutions and services.
- ▲ Working closely with a community of UBmatrix development partners around the world, ensures that UBPartner can offer XBRL solutions that continue to meet the demanding requirements of its customers.
